*Hiring a minimum of 5 servers

g-Backup for workstations

For your PC or MAC

g-BACKUP Workstation

We protect your employees' workstations with all the support and security of GIGAS.

Includes 100 GB of space for your copies.

From **4,5 €** / month per workstation

g-Backup for Microsoft 365

g-BACKUP 365

g-Backup for Microsoft 365 is a solution to protect the data of all the applications within 365. Microsoft's Software as a Service platform is robust, but it doesn't safeguard data beyond 140 days.

Our solution ensures a three-year retention and unlimited storage.

1,8 € / month per user

Design and architecture of our g-Backup solutions

Here we leave you the schematics of g-backup solutions so that you can choose which one best suits your business, g-Backup Workstation and g-Backup Server are the easy to implement solutions, immediate provisioning with a high cost-effectiveness.

g-Backup Workstation

Very simple backup plans for workstations (laptops / desktops) designed for small and medium-sized businesses, designed to safeguard work files, documents and files.

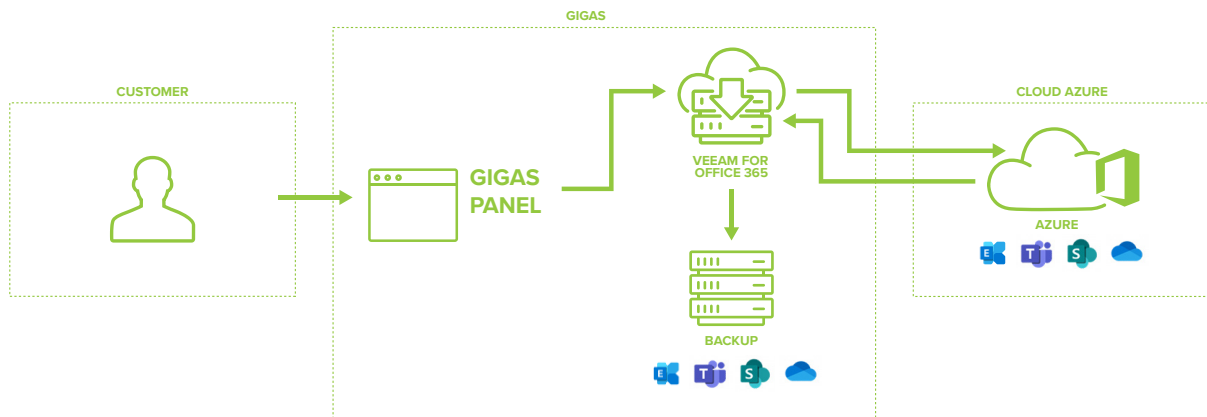

Available add-ons: additional storage and connectivity

g-Backup 365

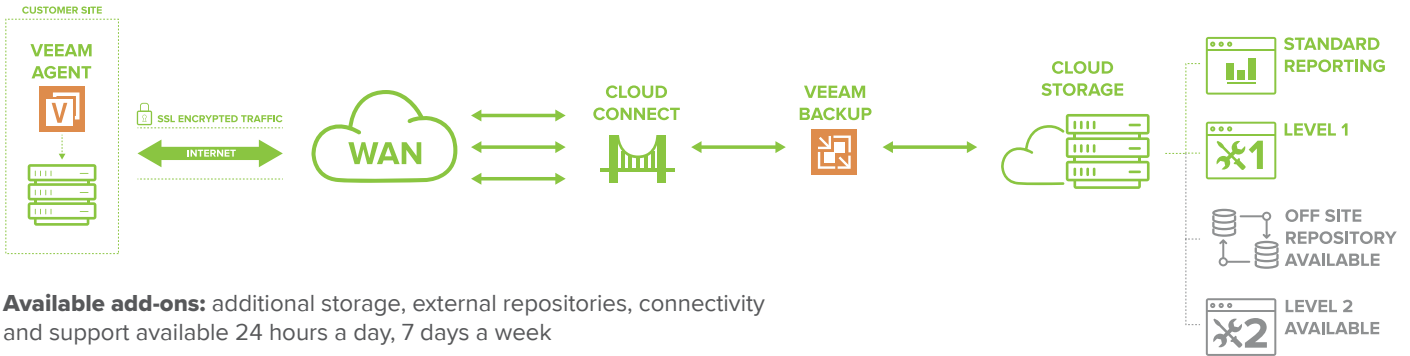

With a data retention of three years and unlimited storage, g-Backup 365 gives you the peace of mind you need to face threats such as viruses, ransomware, corruption or data loss, always with Gigas support.

Retrieve your information whenever you need it, anytime, anywhere.

g-Backup Server

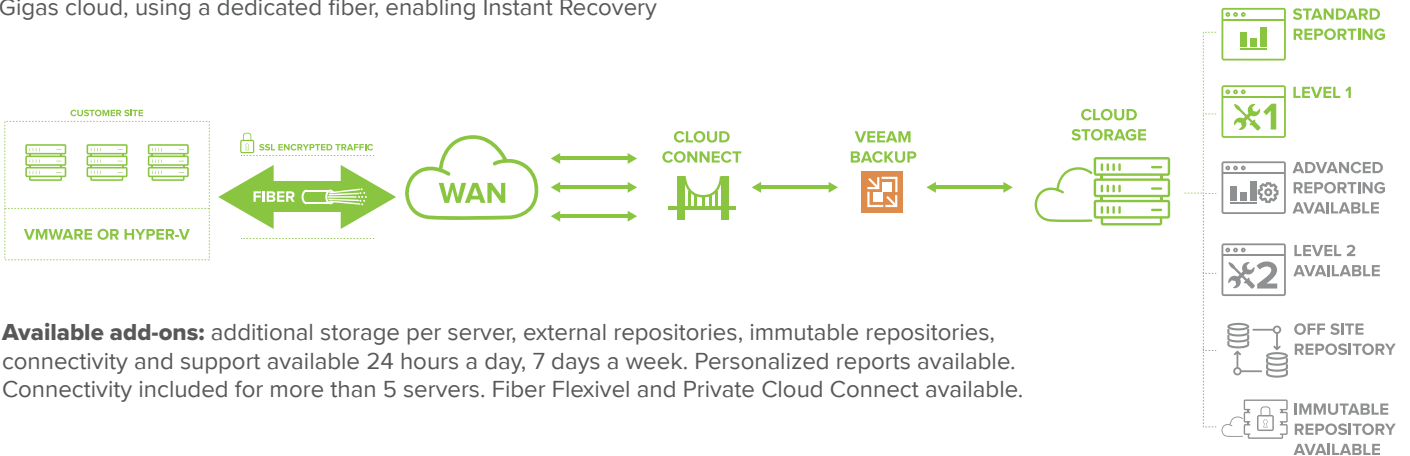

Very simple server backup plans designed for small and medium-sized enterprises, focused on safeguarding work files, documents and files, operating system, volumes and complete server recovery (Baremetal).

Available add-ons: additional storage, external repositories, connectivity and support available 24 hours a day, 7 days a week

g-Backup Business

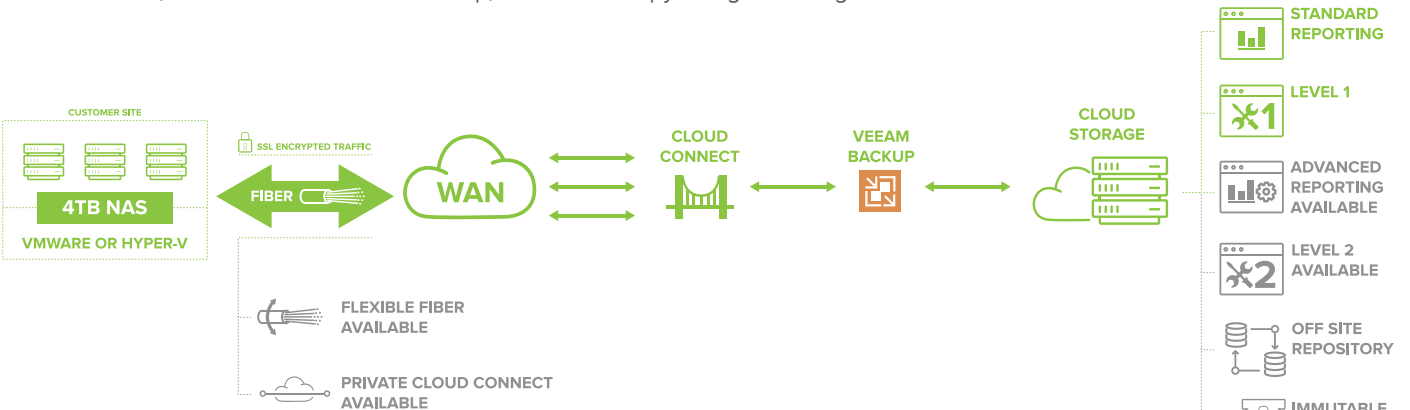

Backup plans for medium and large enterprises, safeguarding the customer's Veeam infrastructure to the Gigas cloud, using a dedicated fiber, enabling Instant Recovery

Available add-ons: additional storage per server, external repositories, immutable repositories, connectivity and support available 24 hours a day, 7 days a week. Personalized reports available. Connectivity included for more than 5 servers. Fiber Flexivel and Private Cloud Connect available.

g-Backup Business +

Backup plans for medium and large companies, safeguarding the customer's Veeam infrastructure to the Gigas cloud, using a dedicated fiber, with a NAS for the first backup, the second copy being in the Gigas cloud.

Available add-ons: additional storage per server, external repositories, immutable repositories, connectivity and support available 24 hours a day, 7 days a week. Personalized reports available. Connectivity included for more than 5 servers. Flexible Fiber and Private Cloud Connect available. Mandatory 12-month stay.

ADVANTAGES

Automates, simplifies and protects your company's backups

YOUR CHOICE:

You can choose the replication support that suits you best: Tapes or NAS on-premises, in our cloud, or in both.

SUPPORT 24x7:

We have everything: configuration, training, implementation, daily monitoring of backups and periodic reports and response in case of problems. In addition, our highly qualified and upcoming technical service will support you 24x7 in the most

PARTNERS:

We are Cloud & Service Provider Platinum from Veeam, and partners from Ahsay to offer you with full support the best solutions in virtual environments, both local and in the cloud.

FOR SMEs:

Solutions designed for office environments, from the simplest to the most professional, SMEs or Local Public Administrations, where the volume of data, the complexity of the infrastructure and its impact on response times are a challenge. We have scalable solutions that are adaptable to every need.

TAILORED TO YOUR COMPANY:

Don't worry about licenses, technologies, and backup tools. Our solution takes care of everything (hardware, software and services) tailored to your needs and with the most efficient backup engine for you.

CONNECTIVITY INCLUDED:

The advantages of having a global provider: Hire your g-Backup for more than 5 servers and we offer the conectividade(FTTH 250Mb).

SAFE AND SCALABLE:

With all the guarantees required by the General Data Protection Regulation. A simple, fast and 100% secure solution that you can add to our Gigas Recovery service.

IMMUTABLE REPOSITORY:

Add to your premium g-Backup the advantages of working with an Immutable Veeam repository, a solution that allows you to make storage where the backup is stored cannot be modified even by Veeam himself.

Choose the backup solution that best suits your needs
