

PRESS RELEASE

15 MARCH 2018

Gigas, the first to offer advantages in SAP Hana rollouts from a TDI Compliant cloud platform

Gigas (GIGA.MAB), a Spanish multinational cloud computer services company, has launched a pioneering solution in the provision of cloud infrastructure services for **SAP Hana** under the Tailored Data Center Integration (TDI) model.

A SAP-certified supplier since 2014, Gigas has SAP HANA-certified infrastructure under the TDI Compliant model. With this model, Gigas affords IT departments and SAP integrators more flexibility and cost savings, as well as seamless integration of systems and applications.

Based on an architecture built on HP Blade servers, Intel Xeon processors, Virtualización VMware and Netapp data storage systems, Gigas' SAP Hana Cloud solution makes Gigas the first company to offer this product under a TDI compliant model.

Unlike most cloud providers, which offer platforms for Hana with default instances or dedicated models, which are rigid and require hefty investment, Gigas is rounding off its current range of advanced cloud computing services to leverage greater synergies with systems and applications deployed onsite.

About Gigas.com

Gigas is a Spanish company, listed on the Mercado Alternativo Bursátil (Spanish Alternative Equity Market or MAB) since 2015 (GIGA.MAB), which specialises in cloud computing services. Incorporated in 2011, it has become one of the world's leader providers in the sector, according to Gartner's "Magic Quadrant for Cloud Infrastructure as a Service" report. Gigas, which offers cloud computing solutions, stands out for its cutting-edge technology and exceptional technical support. With data centers in Madrid, Barcelona, Miami and Santiago de Chile, the company has offices in Spain, Colombia, Chile, Peru, Miami, Panama and Mexico. The company is the only public cloud services provider in Spain for European Commission institutions after winning the public tender held in 2015. Its platform offers a high level of security and is certified in accordance with international standards, such as ISO 27001 and PCI DSS Level 1.
