Gigas takes Jidoka software robots to the cloud

Gigas signs deal as Jidoka's strategic provider in Spain and Latin America to promote its cloud-based robotic process offering

Gigas (GIGA.MAB), a Spanish multinational cloud computer services company, has entered into a partnership agreement with Jidoka creator Novayre to offer its clients a flexible and secure cloud environment in which it can roll out and manage Jidoka's software robots.

Jidoka's robots, using RPA (Robotic Process Automation) technology, are programmes that can automate repetitive processes, keeping corporate processes with continuous flow and error-free.

Under the agreement between the two companies, Gigas will provide Jidoka customers with a cloud environment that offers on-demand scalability to the needs of each process and full control of automated tasks through a comprehensive control panel.

Jidoka is a reference within the global RPA solutions marketplace, recognised recently by Gartner in its latest Market Guide for Robotic Process Automation Software report. The partnership with Gigas will enable Jidoka to broaden the variety of licencing options, include traditional on-premise licenses and a cloud services model that delivers companies' needs of having more flexible availability of robots on a pay-per-use basis (Saas). Accordingly, Jidoka clients can deploy their "digital staff" of software robots in accordance with their needs, without having to make large initial investments, and in a completely secure environment.

Major international consulting firms and leading companies in the banking, finance, insurance, energy and healthcare industries in over 20 countries are now using Jidoka robots in their business processes. The partnership provides access to hosted automation infrastructure in one of the most innovative, accessible and scalable cloud platforms, not to mention full technical support.

About Gigas.com

Gigas is a Spanish company, listed on the Mercado Alternativo Bursátil (Spanish Alternative Equity Market or MAB) since 2015 (GIGA.MAB), which specialises in cloud computing services. Incorporated in 2011, it has become one of the world's leader providers in the sector, according to Gartner's "Magic Quadrant for Cloud Infrastructure as a Service" report. Gigas, which offers cloud computing solutions, stands out for its cutting-edge technology and exceptional technical support. With data centers in Madrid, Barcelona, Miami and Santiago de Chile, the company has offices in Spain, Colombia, Chile, Peru, Miami, Panama and Mexico. The company is the only public cloud services provider in Spain for European Commission institutions after winning the public tender held in 2015. Its platform offers a high level of security and is certified in accordance with international standards, such as ISO 27001 and PCI DSS Level 1.
