

SAP® Certified in Infrastructure Operations Services

From physical to virtual: the definitive leap of your SAP HANA to the cloud with high availability and the flexibility Gigas offers

Gigas offers you SAP approved infrastructure to deploy your cloud servers for your SAP HANA projects in the cloud. It offers total security and the guarantee of SAP support. Our infrastructure is based on the latest generation of high-density HP blade servers that are optimized for your SAP HANA, VMWARE VSphere® virtualization and approved Netapp storage system, with which we offer you a cloud solution with all the guarantees you need. The Gigas cloud model avoids large initial investments and suggests that you manage your SAP HANA on a pay-as-you-go basis.

An efficient solution with which you can design the resources your SAP HANA needs at any given moment and instantly deploy or grow in the cloud. Gigas' platform has been specially designed to increase, decrease, clone and redistribute resources (memory, CPUs, storage, VLANs, VPN, firewalls. etc.) in real time.

Easily deploy your SAP HANA projects on our advanced SAP-certified platform. Increase, decrease or redistribute resources with just a click.

Gigas also ensures the network speed necessary to connect to your SAP HANA via a connection that moves data at speeds of up to 10G/s, and is fully redundant. In addition, you can connect your offices to the SAP HANA platform at Gigas via a VPN with three tunnels to offer maximum versatility and security to design the network architecture you require.

¿Why SAP HANA on Gigas?

- Simple, flexible, scalable and faster
- Pay-as-you-go system
- Financially predictable model, transparent and verifiable
- VPN with up to 3 tunnels to connect from your offices
- Redundant infrastructure and maximum security. Tier III and Tier IV data centers at the Gigas Datacenter you choose: Madrid, Barcelona, Miami and Santiago de Chile
- Security for your critical data: ISO 27001 and Level 1 PCI DSS certifications
- 24/7 technical support for the physical infrastructure
- We do not offer added services. If you are an integrator, we are the ideal partner for you

ABOUT GIGAS

We are a multinational company specialized in high quality cloud hosting. Set up in 2011, we have offices in Spain, the UK, the USA, Colombia (Bogota and Medellin), Chile, México and Panama.

In addition, we have five datacenters: in Spain, Chile and the USA.

Gigas is also the first SAP certified provider of cloud Infrastructure Operations in Spain as well as in Latin America.

Gigas' certification in "Infrastructure Operations Services" ensures that our service infrastructure integrates perfectly with SAP applications in a secure, flexible, high availability, simple, inexpensive environment, with the best level of 24/7 support.

THE ADVANTAGES OF CLOUD HOSTING TECHNOLOGY

Cloud technology represents a shift in the way infrastructure services are provided and involves increased functions at a lower cost. Being in the Cloud provides companies with faster access to technology and services, provides greater competitiveness and business efficiency. Advantages are:

- **Savings on costs**
- **Pay-as-You-Go**
- **Scalability/Flexibility**
- **Security**
- **Competitiveness**
- **High availability**
- **Agility**

IaaS vs. traditional hosting (dedicated servers)

- » Savings on costs, Pay-as-You-Go
- » Total flexibility
- » More reliable, high availability
- » Fast implementation
- » High quality of enterprise grade resources
- » Backups automatically copied
- » No fixed-term contract

IaaS vs. soluciones in-house (en las instalaciones)

- » Savings on costs, Pay-as-You-Go
- » Total flexibility
- » More reliable, high availability
- » Fast implementation
- » High quality of enterprise grade resources
- » Backups automatically copied
- » No initial or continuous CAPEX investment
- » No maintenance

WHY HAVE YOUR SAP PLATFORM WITH GIGAS?

- International technology and recognition
- First SAP certified provider of Infrastructure Operations Services
- + 4.000 clients in over 90 countries
- Latest generation hardware
- ISO 27001 y PCI DSS-Nivel 1 certifications
- Compatible with Business One, Business All in One, R3 and HANA

AND...

Your SAP cloud datacenter, ready in 10 minutes

At last, a service that is easy to use and hire. Install your own SAP datacenter in 10 minutes, with as much power you require. Enjoy our trial offer to see how simple and powerful the platform is. Contact us without obligation. Gigas is here to offer you customized service, tailored to your needs.

Progressive rate until to production

Gigas will be with you throughout the process of migrating your SAP datacenter to the cloud. We will help you to individualize and design your platform as well as offer you a progressive rate, in stages, until your platform has been completely installed and is fully working.

What are people saying about Gigas?

“After a careful and in-depth assessment we chose Gigas’ Cloud as it met all our requirements. It is incredibly simple to use and offers advanced functions for creating and modifying virtual servers on demand and with just a few clicks, as well the possibility of making full backups and installing full operational systems.”
