Security

g-Backup

Managed backup solutions to protect your company's information

g-Backup offers a variety of advanced solutions for your backups, in the cloud, on-premises or in a hybrid model.

Fully managed solutions at a very competitive price, to which you can add connectivity and communications products simply and efficiently.
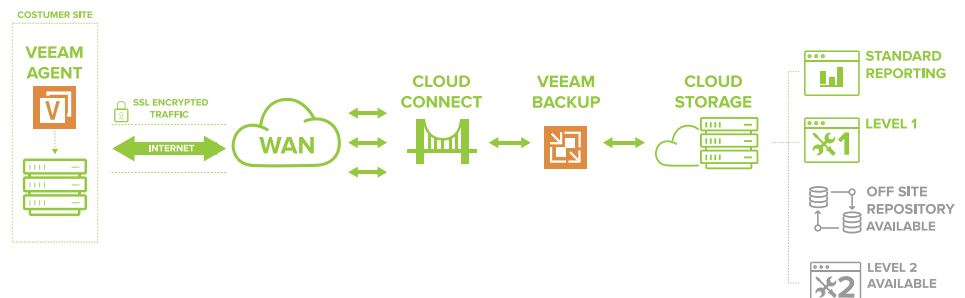

Backup for servers

g-Backup Server

Includes 1 TB of space for your copies

Protect your **physical or virtual** servers with Veeam backup and Gigas support and security.

Ideal for backing up work files, documents, applications, operating system, or for a complete recovery of the company's physical servers.

30 € month/server

Available add-ons:

- Additional storage
- Support available 24 hours a day, 7 days a week
- External repositories (second repository)

g-Backup Business

Includes 1 TB of space for your copies

Backup solution for medium and large enterprises based on Veeam Cloud Connect, backs up the customer's Veeam infrastructure to the Gigas cloud, with the possibility of adding a dedicated fiber to enable **instant recovery.**

From

65 € month/server

Available add-ons:

- Additional storage per server
- Support available 24 hours a day, 7 days a week
- External repositories (second repository)
- Immutable repositories (third repository)
- Personalized reports available
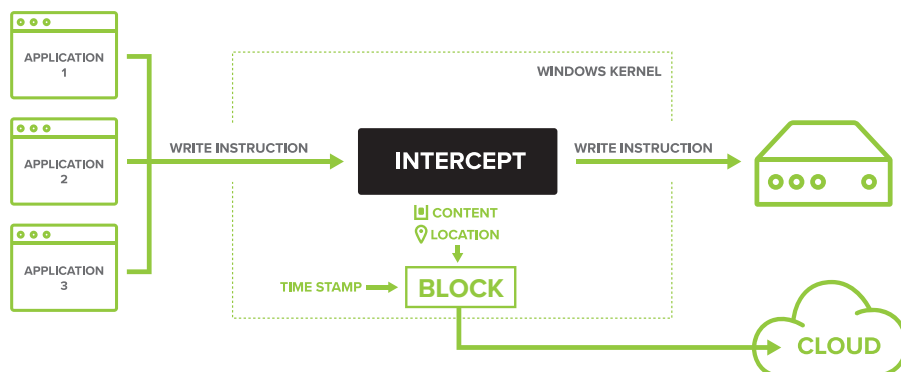

Backup for workstation

g-Backup Infinite

Unique solution developed by Gigas

g-Backup Infinite automatically, continuously and immutably backs up your computer after every write to disk, saving infinite versions of your files. **Choose the date, hour and minute and recover the files you need.** A revolution in the backup world.

Advantages

Automates, simplifies and protects your company's backups

Your choice:
You can choose the replication support that suits you best: local NAS, our cloud, or both locations.

100% managed:
We offer a fully managed service, including configuration, deployment, daily backup monitoring, periodic reports, and incident response.

24/7 Support:
Our highly qualified, approachable technical team will support you 24/7 with anything you need.

Full support:
We are a Veeam Platinum Cloud & Service Provider and Ahsay partners, providing full support for the best solutions in virtualised environments, both on-premises and in the cloud.

Para SMEs:
Solutions for all environments, from offices and professional practices to SMEs and local public administrations, where data volume, infrastructure complexity, and response times are challenging.

Tailored to Your Business:
Solutions designed to implement the backup your company needs: workstations, physical or cloud servers, immutable repositories, storage, and more.

Connectivity Included:
Benefit from having a global provider: subscribe to g-Backup for more than 5 servers and receive connectivity (FTTH 300Mb) for free.

Secure and Scalable:
We offer scalable solutions adapted to every need, fully compliant with the General Data Protection Regulation. A simple solution, quickly deployable and 100% secure.

Immutable Repository:
Enhance your g-Backup Premium with the advantages of an immutable Veeam repository, ensuring that the storage where backups are kept cannot be modified, not even by Veeam itself.

Choose the backup that best suits your needs
